DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Eugene Worley on March 6, 2008.

The application has been amended as follows:

IN THE CLAIMS:

Claim 11. The method of claim [10] 1, wherein the image property comprises one or more of density, color, hue, saturation, or reflectivity.

Claim 12. The method of claim [10] 1, wherein determining first correlation loss data further comprises repeating the determination for a plurality of data locations situated along a line in the first image and a corresponding line in the second image.

Claim 24. The computer program stored in the computer-useable medium of claim [23] 14, wherein the image property comprises one or more of density, color, hue, saturation, or reflectivity.

Claim 25. The computer program stored in the computer-useable medium of claim [23] 14, wherein determining first correlation loss data further comprises repeating the determination for a plurality of data locations situated along a line in the first image and a corresponding line in the second image.

The following is an examiner's statement of reasons for allowance:

The prior art of record does not disclose or suggest, *inter alia*, a method of tracking the position of an imaging head of a catheter in three-dimensional space within a human body, the method comprising: receiving a first image captured by the catheter; receiving a second image captured by the catheter, wherein the first image comprises a first data location and the second image comprises a second data location corresponding to the first data location; comparing the first and second images to determine first correlation loss data between the first and second images, wherein determining the first correlation loss data comprises determining a difference in an image property between first image data stored in the first data location and second image data stored in the second data location; determining a first rate of correlation loss between the first and second image in a direction using the first correlation loss data, wherein determining the first rate of correlation loss comprises determining a rate of change of the first correlation loss data; determining a first angle of separation between the first and second images using the first rate of correlation loss; and determining first position data for the second image, relative to the first image, using the first angle of separation; and outputting the first position data.

Concerning the section 103(a) rejection using Ferre et al. (U.S. 5,967,980) in view of Sumanaweera et al. (6,159,152), the examiner agrees with applicant in that neither Ferre nor Sumanaweera, taken either alone or in combination, discloses, teaches or suggests determining "a first rate of correlation loss between the first and second image in a direction using the first correlation loss data; wherein determining the

first rate of correlation loss comprises determining a rate of change of the first correlation loss data" and "determining a first angle of separation between the first and second images using the first rate of correlation loss". Based on the above observations, claims 1, 3-9, 11-14, 16-22 and 24-34 are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JOHN F. RAMIREZ whose telephone number is (571)272-8685. The examiner can normally be reached on (Mon-Fri) 7:00 - 3:30 p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brian L. Casler can be reached on (571) 272-4956. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
